

# Forefront Future

Technology For Tomorrow

## ABOUT US

Forefront Future is a Fintech organisation with the great passion to provide innovative and agile software solutions for ESG (Environment, Social and Governance) data management and investment screening to financial institutions. Our aim is to transform the investment decision process, traditionally revolving mainly around profits, to include more structured ESG data. Organisations using our solutions will benefit from business operations optimisations, productivity improvement and well organised data governance.

## OUR SOFTWARE

### ESG 3PILLAR DATA MANAGEMENT

ESG 3Pillar Data Management Software creates a centralised data warehouse for ESG information by design. ESG 3Pillar Data Management Software takes data from popular source systems such as Bloomberg, Refinitiv Asset4, Refinitiv WorldScope and MSCI; performs metric customisations; and generates reports upon completion.

### ESG 3PILLAR SCREENING

ESG 3Pillar Screening Software provides an ESG screening platform to support investment decision making process. ESG 3Pillar Screening takes trade data from organisations' internal systems, combines with ESG data from popular source systems such as Bloomberg, Refinitiv Asset4, Refinitiv WorldScope and MSCI; performs ESG screening calculations; and output results upon completion.

## OUR CLIENTS

### ESG RESEARCHERS

The main audiences for ESG 3Pillar Data Management Software are ESG Researchers.

### PORTFOLIO MANAGERS

Whereas ESG 3Pillar Screening Software was designed for Portfolio Managers.
